The First Day ☺

Income and Expenditure

It was the first game we played.

The goal of this game is to buy the most things.

The first person with things that are worth over \$100 wins.

We learnt...

how to earn interest from the bank.

Credit & Interest

Game Introduction:

- Buy things and gain points
- Get money by the Credit Card

Whoever has more points at the end will be the winner.
But if he cannot pay his debts, he will lose automatically.

I Learnt That :

We can get money with the Credit Card but we need to be careful about the Interest .

The Second Day ☺

Barter

Game introduction:

1. First, choose 6 kind of animals card, each has 9 cards
2. Then, shuffle the 54 cards
3. After that, give each person 9 cards
4. You can exchange 1-4 cards with everyone but the person who exchange with you must have the same amount of cards
5. The person who get the 9 cards on his/her hand win the game
6. The person who wins twice win the whole game

Feelings... I think it was very difficult to change cards, especially when we have to exchange cards of the same value. So, I think the money we use now is convenient.

Stockery

Game Introduction:

There is a market, we need to trade shares in and out, the person who has the most money at the end of the game will be the winner.

We learnt...

Share Allotment , Right Issue, Dividend , Net income , Trading Suspended, Market Reversal.....

How to differentiate long-term and short-term investments

The best time to trade shares in and out.

Our Feelings
